

WHAT WOULD YOU DO IF YOUR COMPUTER WAS STOLEN OR CRASHED?

A disaster recovery plan from as little as £10 per month plus Vat

No more tapes or disks!

Our unique service allows you to back up and restore all data, files and emails held on your computer. A secure, fast and automated system that guarantees you 24/7 access to your vital data.

Online Backup automatically encrypts and sends your data over the internet to a secure data centre day and night. You can retrieve a single file or restore the entire system to your computer or remotely access at home or away.

The benefits:

- Securely encrypt and back up all your files, databases and emails to our secure off site servers
- Back up all your data over the internet throughout the day or night
- Have instant access to your critical databases and documents, including Microsoft Office, your email file and picture files directly over the internet
- Option to gain immediate access to new emails if your server is unavailable
- Option to recover data from other applications such as Sage, MySQL and Oracle as well as being able to access old emails and calendar online

Prices

Home Users (a single PC)	10Gb per month £10 + VAT
Business Users (i.e. server)	10Gb per month £15 + VAT
	15Gb per month £30 + VAT
