

Oakleigh Computer Services

TRAINING · SOFTWARE SUPPORT · MARKETING · CREATIVE DATABASES · INTERNET SOLUTIONS

Safeguard your hardware & data from power surges and failure.

A power cut damages your hardware and data, protect it with a **U**ninterruptible **P**ower **S**upply (UPS) This device allows up to four* items to continue working even if everyone else is in darkness.

The Powerware 5115 “smoothes out” the power supply (you would be surprised how frequently it fluctuates) It offers up to 30 minutes depending on the load.

The Benefits

- Quick and simple to install.
- Comes with easy to set up software, which has a graphical display of exactly what is going on.
- Any unsaved work will not be lost.
- A cost effective solution to a potential and expensive problem

What does it cost?

This clever little piece of equipment costs just **£120** (rrp £180) plus delivery + VAT

To order just complete and return the application form below:
